

Full Visibility was founded in 2006, as a federally certified, Virginia-based small business. We focus on the **full employee** by providing our exceptionally skilled, committed, and motivated workforce customized benefits and perks, top-tier professional resources, and a supportive company culture. Our clients benefit from our high employee morale and retention rates, leading to a consistent, experienced, quality performance.

Our Proven Core Competencies

Full Stack Enterprise Software Development

We develop functionality for the entire computer system - from customer experience technologies for optimizing front-facing applications, to back-end technologies enabling data management, server, network, and hosting environments.

DevOps Continuous Integration/Continuous Deployment

We embrace the DevOps development practice that uses Agile principles to streamline software building, testing, and release; and utilize CI/CD to simplify our Agile development by using the right tools to speed-up the development and deployment process.

Cloud Services & Unstructured Cloud Data Management

We create and support virtualized environments within Law Enforcement and Intelligence Communities, to provide services and data management solutions, while establishing and maintaining high-availability and robust security standards.

Data Science, Data Visualization, & Machine Learning

We develop systems that effectively apply algorithms to massive amounts of structured and unstructured data to deliver actionable insights. We deliver custom visualization solutions to visually identify patterns, trends, and outliers in data through charts, maps, and graphs. Through machine learning, the algorithms we develop improve results through experience and the use of analytical modeling.
